## WestJet goes live with TRAX eMobility QuickTurn app

MIAMI, October 1, 2019 – WestJet has successfully completed the first phase of their plans for mobilizing maintenance operations with TRAX eMobility apps. The QuickTurn iOS app is now in use. Having tasks, job cards and manuals on a tablet allow for online / offline access at the point of work for the AMEs which results in access to real-time information. Mechanics can conduct the necessary gate activity for aircraft defects upon landing or prior to takeoff. Features include: Delay Recording, Aircraft Part Number Transactions, Troubleshooting, Defects Deferrals or Closings, Dent Mapping, and Parts Requirements.

The next phase is to add the TaskControl, AeroDox and Line Control apps. WestJet joins the increasing number of TRAX customers incorporating eMobility apps with their Trax M&E software in the search for an efficient paperless maintenance operation. TRAX congratulates WestJet on its successful first phase of implementing mobile solutions.

**About WestJet Airlines:** WestJet and their regional airlines, WestJet Encore and WestJet Link, offer scheduled service to 110 destination in North America, Central America, the Caribbean and Europe and to more than 250 destinations in over 20 countries through their airline partnerships.
