

**FOR IMMEDIATE RELEASE**

## **JetBlue adopts TRAX eMobility**

MIAMI, September 18, 2018 – JetBlue is expanding its operation to support a larger airline serving more cities, with more flights and enhanced Mint premium service. Since summer 2017, JetBlue has surpassed 1,000 daily flights to over 90 U.S. and international destinations with plans to purchase more aircraft and ramp up support services. As part of its continued growth, JetBlue has implemented mobile solutions to increase maintenance efficiency, reliable scheduling and reduce aircraft downtime.

TRAX eMobility has an app for every task – These tools are intuitive and well matched to specific maintenance tasks for technicians, crew chiefs and other crew members. JetBlue has implemented the TaskControl, QuickTurn, AeroDox and Line Control apps with plans to expand to additional eMobility offerings.

Adopting Trax eMobility facilitates JetBlue’s achievement of its technology innovation goals and supports the expansion of its fleet and services for its consumer base. eMobility helps the maintenance crews quickly get the airplanes back in the air and the customers on their way.
