

FOR IMMEDIATE RELEASE

## Transavia Airlines to Mobilize their Maintenance

MIAMI, October 26, 2021 – TRAX is happy to announce that Transavia Airlines is adding the Line Control and QuickTurn eMobility apps to its maintenance environment. The airline will experience immense gains from going mobile and paperless. eMobility apps are task-based and intuitive for end users with minimal training required and enhanced productivity achieved. Users access real-time information and are connected from anywhere with truly mobile off-line capability. Reduced aircraft maintenance delays combined with reductions in labor manhours result in huge savings and operational efficiency.

Transavia is a Dutch low-cost airline established in 1965 that offers charter and scheduled flights to summer and winter holiday destinations around Europe and to the Mediterranean and carries 11 million passengers a year. The airline is a subsidiary of the Air France KLM Group. The current fleet consists of Boeing 737-700s and 737-800s. Air France-KLM is currently pursuing a large order of single-aisle aircraft to expand Transavia's operations. The two candidates for purchase are the Boeing 737 MAX and the Airbus A320neo.

With its 56 years of experience and its leading position in the Netherlands as a competitively priced carrier of choice, Transavia plans to continue its growth and modernization. The adoption of mobile maintenance tools such as the TRAX eMobility apps will contribute to offering a safe, efficient, and enjoyable travel experience.

###

**About TRAX:** TRAX provides comprehensive software solutions designed to manage all aspects of aircraft maintenance. TRAX is the premier provider of aviation maintenance mobile and cloud products in the global market today. TRAX products support digital signatures, paperless 'Covid-safe' working including Workpacks and manuals, RFID-capability for logistics, Biometric security, offline capability for its suite of mobile apps, web-based applications, and the ability for users to work anywhere with easy access to real-time information.
