## WestJet plans Transition to TRAX eMRO software

MIAMI, May 18, 2022 – Canadian low-cost carrier WestJet Airlines will transition from the core TRAX maintenance software system to eMRO – the TRAX cloud-based aviation maintenance solution. TRAX eMRO and eMobility are positioned at the leading edge of industry developments with products that support digital signatures, paperless Workpacks and manuals, RFID-capable for logistics, Biometric security, off-line capability for mobile apps, and the ability for its users to work anywhere with easy access to real-time information.

WestJet first went live with the TRAX system in 2005. Since then, the company has continued to evolve and modernize its technology in support of its ever more efficient and improved operation. In 2019, the airline implemented TRAX eMobility with the launch of QuickTurn to mobilize its work processes so that its staff can work from anywhere using their mobile devices. WestJet continues to focus on the use of eMobility apps with Task Control, Line Control and AeroDox as part of their drive for a paperless operation.

Tech savvy TRAX customers like WestJet are turning to eMRO as a proven web-based device-agnostic solution with a modern user interface and a zero-install client. It matches how aviation works today.

###

**About WestJet:** In 26 years of serving Canadians, WestJet has cut fares in half and increased the flying population in Canada to more than 50 per cent. WestJet launched in 1996 with three aircraft, 250 employees and five destinations, growing over the years to more than 180 aircraft, 14,000 employees and more than 100 destinations in 23 countries, pre-pandemic. Since the start of the pandemic the WestJet Group of Companies has built a layered framework of safety measures to ensure Canadians can continue to travel safely and responsibly through the airline's Safety Above All hygiene program. During this time, WestJet has maintained its status as one of the top-10 on-time airlines in North America as named by Cirium.

**About TRAX:** TRAX provides comprehensive software solutions designed to manage all aspects of aircraft maintenance. TRAX is the premier provider of aviation maintenance mobile and cloud products in the global market today. TRAX products support digital signatures, paperless 'Covid-safe' working including Workpacks and manuals, RFID-capability for logistics, Biometric security, offline capability for its suite of mobile apps, web-based applications, and the ability for users to work anywhere with easy access to real-time information.
